

## Congratulations!

**You are one of the elite few chosen for this technology assessment mission.**

Your job, should you choose to accept it... test drive and evaluate our potential tech selection. It is mission critical that you do your absolute best. Your classmates, peers and grades to come are depending on you doing the right thing.

### Please!

1. **Read the user guide instructions!** It may seem silly, but the case cannot work properly if not installed properly. And we need you to give us feedback based on using it as intended.  
Using the case correctly makes you the most qualified to provide design insight.
2. **Keep your machine in the case.** This assessment is not just for the computer, it includes all the accessories too.
3. **Zip it, because the screen is not a handle.** Always close the case and zip it up before carrying it by the handle or strap.
4. **By the way, the case is for the computer only.** No papers, scissors, rocks, pencils, pens or anything else behind the screen, on the keyboard, or in the closed case.

### Remember...

1. Don't throw, kick, sit or step on your computer.
2. Bring us feedback when you return the computer.
  - a. What did you like about the case?
  - b. What did you dislike about the case?
  - c. How can the case be improved?

And, of course, follow all the regular school guidelines for computer use. You know, the Acceptable Use Policy, etc.

**Yes, I agree to take on this project as part of the Technology Assessment Team.**

I, \_\_\_\_\_, (full name) accept the great responsibility and power that comes with this mission. By doing so, I agree to follow all school policies and regulations during and after the school day. I also agree to return the computer and its accessories in good working condition at the end of the mission.
