1

Installing Your TB-55 in the Case

With your device closed, and the bottom facing the ceiling, using the provided Velcro Template, adhere the black Loop Velcro to the bottom of the machine, making sure it aligns with the Hook Velcro on the inside of the case. Be sure to allow 24 hours for the adhesive to cure.

2

Open your machine fully and slide the screen up into the TPU screen retention straps (#4).

3

Align the machine base in the center of the case (make sure battery release is visible and press the Velcro together carefully. Wrap the nylon retention strap over the base of the device and insert it through the slot. Pull the strap through the glide, eliminating any slack. Then fold the strap over, engaging the Velcro.

4

Stretch the Elastic Retention Straps over the back corners of the machine.

Handle Use

The TB-55 Always-On case features a unique dual-zipper design that allows the machine's built-in handle to be a primary method to carry your TOUGHBOOK 55.

Caution

- Pay attention to not open the device beyond 135° as the display portion will come loose from the TPU corner straps.
- The device should also not be opened beyond 135° as to not put pressure on any cables connected to the back of the device.
- When using the X-strap, the hand and forearm will be under the air vent, therefore the user may feel the heat coming from the device air vent.
