- 7) Retention Strap Glides
- 8) Retention Strap Slots

*Velcro may cover one of the information labels on your device.

1

Installing Your B360 on the ModuFlex

With your device closed, and the bottom facing the ceiling, using the provided Velcro Template, adhere the black Loop Velcro to the bottom of the machine, making sure it aligns with the Hook Velcro on the inside of the case. Be sure to allow 24 hours for the adhesive to cure.

2

Align the machine base in the center of the ModuFlex. Pull both nylon retention straps up under the device's built-in handle.

**3**

Wrap the nylon retention strap over the base of the device and insert it through the slot. Pull the strap through the glide, eliminating any slack. Then fold the strap over, engaging the Velcro. Stretch the Elastic Retention Straps over the back corners of the machine.

Shoulder Strap or Optional User Harness Use

The B360 ModuFlex includes D-rings for shoulder strap or four point user harness utilization. These provide hands free transportation and use of your Getac B360.

Warranty

InfoCase products are dynamic, consistently improved and reinvented to bring you the best products on the market. We use only the highest quality materials to meet your mobile technology demands.
