

*Image A*

*Image B*

*Image C*

- Wrap the D-Ring around handle with the anti-skid material facing the computer. *Image A*
- **Angle the smaller d-ring** so that one corner can be pushed into the **larger d-ring**. Once the first corner is pushed through, the rest of the smaller d-ring will easily follow. *Image B* The smaller d-ring will NOT fit through if not inserted at an angle.
- The shoulder strap should be attached the SMALL d-ring only. *Image C*  
This method of attachment will insure that the strap will not slide along the handle of the computer.

**Correct Installation**

**Incorrect Installation**

*The D-rings should not be used without installing according to the instructions above*

**Part Number:** FM-MBKIT
