

# InfoCase Heavy Duty Shoulder Strap Kit User Guide

## Introduction

---

The InfoCase Heavy Duty Shoulder Strap kit is designed and intended for transporting larger devices.

## Features

1. Shoulder Strap
2. O Rings
3. Webbing Glides
4. Nylon Webbing Straps

## Installation

1

The nylon webbing straps (4) are installed into the two slots that are built into the device. The two straps are inserted from the top of the device as shown. Please ensure the front faces of the Webbing Glides(3) are facing up during installation as shown in the Feature list above. Slots may vary based on your device.

**2**

Once the nylon webbing strap (3) is fully inserted through the device slot, it needs to be looped through the bottom of the webbing glide (2) as shown. To finish installing, loop the strap back through the top of the glide and pull tight.

**3**

Repeat the steps so both straps are installed properly.

**4**

Once both straps are installed, connect the shoulder strap (1) clip to the O-rings (2).

---

## Tips for Use

---

- The length of the shoulder strap (1) is adjustable via a webbing glide located near the end of the strap.
- The comfort pad can be adjusted and can slide over the webbing glide to ensure comfortable transport of your device.

## Caution

---

- The webbing glides (3) should be tightened down as much as possible to ensure a tight connection.

## Warranty

---

InfoCase products are dynamic, consistently improved and reinvented to bring you the best products on the market. We use only the highest quality materials to meet your mobile technology demands.
