

PERMALOCK XP

LOCKED ONCE. PROTECTED 24/7.

Patent Pending

IT'S A LOCK!

LOCK-ON SECURITY NO MORE LOST CASES

Cases only work when they stay on. The PermaLock XP Case securely locks onto your devices to keep them protected 24/7 from accidental or intentional damage, and ensures devices are returned at the end of the year without a missing top or bottom. PermaLock XP is easy for your IT team to install and near impossible for students to remove.

THE PERMALOCK XP CASE SAVES YOUR DEVICES

By locking onto your devices using a 6-lobe security screw, PermaLock XP offers rugged drop protection that students can't remove. Tested from 6ft, InfoCase goes above and beyond to ensure that your devices are always protected so that your students can stay connected to learning.

ADVANCED PROTECTION FOR ALL YOUR CLASSROOM DEVICES

INFOCASE PERMALOCK XP

TOP FEATURES

- **Tamper-Resistant** – Securely locks onto devices to prevent students from removing the case.
- **Drop Tested, Middle School Approved** – because real-life durability matters more than lab tests.
- **Eliminates Screen Bounce in Tablet Mode** – by folding flush for 2-in-1 devices.
- **Extends Longevity of Hinges** – with perfect alignment, a lightweight design, and fold-flat capability for tablet mode.
- **Improved Product Durability** – with increased flexibility to prevent cracks in high-stress areas.

ENHANCED DEVICE PROTECTION

The PermaLock XP provides MIL-STD-810H exceeding drop protection with Air Cells and a TPU bumper. Tamper-resistant screws secure the interlocking shells, which evenly distribute drop forces, extending hinge life. It also allows keyboard replacement without case removal and features drainage holes for spills, for easy maintenance. The clear shell enables quick asset tag scanning, and non-slip corners enhance usability.
